# Manchester Museum: Conference Room Technical Specification

The Conference Room is designed for hybrid online meetings, with microphones, camera, loudspeakers and an 86" screen that can all be run from a built in pc, mac, or from a users laptop. Zoom and Teams are installed on the built in computers, any video conferencing software installed on a users laptop will work with the built in cameras and microphones

Microphone pods, power sockets, AV inputs, and USB inputs are built into the conference table. This allows users to run a zoom or teams call from their laptop at the table. All video inputs and USB inputs are switched via the wall mounted control panel.
